DETAILED ACTION

1. Claims 1-27 are pending.
2. As a preliminary matter, Applicant is respectfully requested to note that the Examiner prosecuting this application has changed. All future correspondence should be directed to Examiner Colbert.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 10-27, drawn to communicating trade orders to a marketplace, classified in class 705, subclass 1.
 - II. Claims 8 and 9, drawn to establishing a trading account with a financial institution, classified in class 705, subclass 37.
4. Inventions Group 1 and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as receiving through a computer trade trigger criteria, accessing through a computer the market analysis software, communicating through the computer a trade order based upon the trade decision, and a user interface configured to receive trade trigger criteria from a user. The invention in Group II has separate utility such as establishing a trading account with a financial institution, communicating trade trigger criteria for use by market analysis software and accessing through the use of a computer, the market analysis software to generate a trade decision using the trade trigger criteria and the market data. See MPEP § 806.05(d).

Art Unit: 3624

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
